210 Reflexite's Material Keeps People Safe

No doubt you have heard lots about the offence of Corporate Manslaughter, which came into effect April 2008. The new offence will have a significant affect on how businesses make buying decisions about the visibility of their PPE and fleets. With realms of advice from various organisations the big question is what does it mean when it comes to maximizing the safety of people working in adverse weather conditions, when visibility is poor. Using the right retro-reflective tape or livery film can dramatically improve the visibility of people and vehicles and protect lives. Reflexite's material keeps people safe and seen. Contact us for a free wet demonstration kit ■

211 Draeger X-plores New Options for Twin Filter Face Masks

The lightweight Draeger X-plore 3000 Series of twin filter half-masks is ideal for use in any environment where airborne dusts and metal particles might be found.

Combining comfort and FFP3 levels of performance, the range also offers a wide choice of design options to suit different users as well as different environments. The Draeger X-plore 3300 limited life version is ideal for those requiring an economical yet comfortable respirator for short duration, one-off applications, whilst the X-plore 3500 offers robust, reusable protection for longer term wear. Available in three sizes and easily adjusted to ensure an optimum fit for different face shapes, the range also features an innovative X-guided strap system to ensure an even weight distribution. In addition, the 3500 incorporates a revolutionary "drop down" design to allow easy removal without, for example, having to remove a safety helmet. ■

212 HeadsUP Lite™ 2690 from Peli

Bright, abundant, hands-free light will always be just a twist away with the new HeadsUP Lite™ 2690 from Peli™ Products, the global leader in the design and manufacture of advanced lighting systems and virtually indestructible cases. The 2690 is a tough, weather-resistant, headlamp with a twist-actuated switch, designed for easy gloved-hand operation. Weighing in at a mere 117 grams with batteries, the headlamp features a super-bright, next-generation LED that radiates 60 lumens at peak brightness and gives usable light for up to 10 hours. Ideal for map reading or lighting a dark trail, the 2690 offers a 90 degree pivoting lens, so users can focus the light where they need it most. Moreover, with ATEX approvals pending, this new headlamp will be the perfect companion for use in hazardous locations. The HeadsUP Lite 2690 comes complete with both a rubber headband for hard hat or helmet use and a comfortable cloth headband as well as three AAA batteries. ■
